

Purposeful Play Workshops

For Educators of Young Children

WINTER '23-'24

SATURDAYS \$45 per session

9:00 am-12:00 pm

3 Hours each

- December 2, 2023
- January 13, 2024

DESCRIPTION

Join the i3 Institute: Inquiry, Intention, and Innovation, at its lab school, Center of Gravity, for a playful session that promotes STEM learning for infants through preschoolers.

In addition to lecture and theory on brain development and play, we will provide various stations for loose parts and gross motor provocation to develop 21st-century learning skills through play, observation, and documentation.

Upon completion of this training, professional development hours will be added into the California Workforce Registry. Saturday workshops are stand alone but will build on concepts if participants decide to take multiple sessions. *Wednesday workshops are split into 2 sessions, you must attend both to receive full credit.*
